THE MARMARA LEGACY

THE MARMARA ODYSSEY:

A LEGACY IN STONE

Welcome to a journey where geology and mythology intertwine.

Our collection originates from the sacred quarries of Marmara Island, a region revered since antiquity, where the stone itself carries the indelible marks of *History*.

At the core of our offering is the exceptional **Marmara Dolomite**, a stone born under intense metamorphic fire. With a superior Mohs hardness of 3.5 – 4 and a fine crystalline density of 2.82 – 2.84 g/cm³, the Dolomite offers unparalleled durability, mirroring the resilient spirit of Hestia, the eternal guardian of home. Its pristine whites, combined with low water absorption and remarkable UV resistance, make it the definitive choice for enduring beauty both indoors and out.

Beyond Dolomite, our quarry yields a spectrum of sublime marbles, each representing a mythological expression: the dramatic weining of Zeus's Thunderbolts, the purity of Aphrodite's Birth, and the flowing currents of Okeanos's Rivers.

These very stones once graced the grand Roman imperial baths, shaped the finest Ancient Greek sculptures, and adorned the sophisticated Ottoman hammams. Marmara Stone is the material that literally laid the *foundations of civilizations most brilliant* chapters.

Discover the soul of Marmara, sculpted by nature, and destined for your masterpiece.
